SUMMARY

DevOps-focused engineer with hands-on experience building CI/CD pipelines, containerizing workloads with Docker and Kubernetes, and automating end-to-end reporting and deployment workflows using Python and shell scripting. Currently at Apple, shipping internal tooling adopted across multiple teams and supporting 200+ engineers on a Kubernetes-hosted backend. Background spans CI/CD pipeline development, JFrog Artifactory image management, Bitbucket version control, automation configuration management, and agile cross-team collaboration. CompTIA Security+ certified with additional experience in SIEM monitoring, Active Directory, and platform security from a prior SOC role.

EXPERIENCE

Automation & Reporting Engineer (Career Experience) — Apple

2026-01 – Present

Sunnyvale, CA

- Built and shipped a Python SDK that automates an end-to-end CI/CD-integrated test reporting pipeline, from REST API data ingestion and Tableau dashboards to HTML/CSS email reports — reducing report turnaround from ~3 hours to minutes.
- Containerized the reporting workflow with Docker and deployed via internal CI/CD tooling, demonstrating continuous integration and continuous delivery pipeline development.
- Managed Docker image versioning and distribution using JFrog Artifactory, maintaining a reliable internal package registry adopted by multiple engineering teams.
- Used Bitbucket for source control and collaborated across teams in an agile environment to drive adoption of shared tooling, enabling multiple programs to reuse the same automation configuration.
- Built and maintain a Python backend and dashboard application that aggregates test data into monitoring views for 200+ engineers, hosted on Kubernetes for scalability and reliability.
- Analyzed existing reporting processes and recommended automation improvements that eliminated manual steps and optimized system performance.
- Contributed to documentation of best practices and standard operating procedures for deployment and automation workflows.

SOC Analyst — Charles IT

2023-06 – 2024-02

Middletown, CT

- Monitored and triaged SIEM alerts and investigated security incidents, contributing to platform security and vulnerability management for MSP clients.
- Managed user access, VPN configurations, and network policies using Active Directory and Cisco Meraki, supporting incident escalation and resolution workflows.
- Supported release management and production support activities by maintaining secure, stable client environments.

Genius — Apple

2024-02 – 2025-12

New Haven, CT

- Maintained a Net Promoter Score above 90 through hardware and software troubleshooting on macOS and iOS devices.
- Mentored teammates on technical workflows and led daily operational processes.

Director of Creative Solutions — BrightMinds Speakers

2019-06 – Present

Remote

- Led creative production and developed content strategies for small business clients, consistently generating thousands to millions of views using Final Cut Pro and other production tools.

EDUCATION

Western Governors University — B.S. , Cybersecurity

None – 2026-12

- Expected Graduation: Dec 2026

SKILLS

language: Python, Shell Scripting, Bash, JavaScript, SQL, HTML/CSS

tool: Docker, Kubernetes, JFrog Artifactory, Bitbucket, CI/CD tooling, REST APIs, Git, Tableau, Active Directory, Cisco Meraki, Slack

platform: Azure, macOS/iOS

skill: Automation Configuration Management, Agile Cross-team Collaboration, Platform Security Vulnerability Management, Incident Escalation Management, AI integration, test automation, SIEM

CERTIFICATIONS

CompTIA A+ — CompTIA None

CompTIA Network+ — CompTIA None

CompTIA Security+ — CompTIA None
