SUMMARY

Automation and tooling engineer with hands-on experience building and shipping internal developer tools, dashboards, and reporting pipelines used by 200+ engineers at Apple. Skilled at translating technical workflows into usable products, collaborating cross-functionally with stakeholders, and driving adoption of new tooling across teams. Background spans Python backend development, CI/CD automation, REST API integration, and data visualization — with additional experience in IT support, security operations, and stakeholder communication. Currently pursuing a B.S. in Cybersecurity and passionate about building technology that improves the day-to-day experience of the people who use it.

EXPERIENCE

Automation & Reporting Engineer (Career Experience) — Apple

2026-01 – Present

Sunnyvale, CA

- Owned end-to-end product delivery of an internal Python SDK — from ideation and development through packaging, publishing, and cross-team adoption — enabling multiple programs to reuse the same reporting tooling.
- Partnered with a second engineering team to drive adoption of the SDK, acting as the primary point of contact for onboarding and iterative feedback, mirroring a product owner's role in stakeholder communication and change management.
- Translated engineering requirements into a fully automated test reporting pipeline — ingesting API data, generating Tableau dashboards, and delivering HTML/CSS email reports — cutting report turnaround from ~3 hours to minutes.
- Built and maintain a Python backend and dashboard application that aggregates test data into views engineers use to monitor testing activity, hosted on Kubernetes to reliably scale to 200+ engineers.
- Containerized workflows with Docker and deployed via internal CI/CD tooling; managed image versioning and distribution through JFrog Artifactory.
- Collaborated cross-functionally with stakeholders across teams to define requirements, communicate progress, and ensure delivered features met predefined criteria.

Genius — Apple

2024-02 – 2025-12

New Haven, CT

- Maintained a Net Promoter Score above 90 by delivering consistent, high-quality hardware and software troubleshooting on macOS and iOS devices — demonstrating a customer-first, service-oriented mindset.
- Led daily team briefings and mentored teammates on technical workflows, supporting team performance and knowledge sharing.

SOC Analyst — Charles IT

2023-06 – 2024-02

Middletown, CT

- Monitored and triaged SIEM alerts, investigated security incidents, and managed user access and VPN configurations using Active Directory and Cisco Meraki across multiple MSP client environments.
- Communicated incident findings and remediation steps clearly to both technical and non-technical stakeholders.

Director of Creative Solutions — BrightMinds Speakers

2019-06 – Present

Remote

- Led creative production and developed content strategies for small business clients, consistently producing content that generated thousands to millions of views — demonstrating strategic thinking, stakeholder management, and iterative improvement.

EDUCATION

Western Governors University — B.S. , Cybersecurity

None – 2026-12

- Expected Graduation: Dec 2026

SKILLS

language: Python, JavaScript, SQL, Bash, HTML/CSS

tool: REST APIs, Tableau, Docker, Kubernetes, Git, CI/CD tooling, JFrog Artifactory, Bitbucket, Active Directory, Cisco Meraki

platform: Azure, macOS/iOS

skill: Agile Cross-team Collaboration, Stakeholder communication and management, Change management and organizational communication, AI integration, test automation, Shell Scripting
