SUMMARY

Motivated technologist with hands-on experience as a Product Owner maintaining and delivering internal applications, driving agile ceremonies, and translating business needs into shipped product features. At Apple, I own the full product lifecycle for internal engineering tools — from roadmapping and sprint planning to deployment on Kubernetes — serving 200+ engineers. I bring UX/UI collaboration experience, AI-integrated product development, cross-team stakeholder communication, and a background in both employee-facing and customer-facing product channels. Formal Agile Project Management coursework and Jira-driven delivery complement my technical depth in Python, CI/CD, and data-driven dashboards.

EXPERIENCE

Automation & Reporting Engineer (Career Experience) — Apple

2026-01 – Present

Sunnyvale, CA

- Serve as product owner for internal engineering tools — defining requirements, prioritizing the backlog, and driving iterative delivery in an agile environment using Jira to plan, track, and deliver projects efficiently.
- Translate business and engineering needs into user stories, acceptance criteria, and sprint-ready features for both technical and non-technical stakeholders.
- Built and shipped a Python SDK with AI-driven summarization that automates an end-to-end test reporting pipeline — from REST API data ingestion and Tableau dashboards to HTML/CSS email reports — reducing report turnaround from ~3 hours to minutes.
- Containerized the reporting workflow with Docker and integrated it into internal CI/CD tooling; published the SDK to the internal package registry and partnered with another team to adopt it, enabling multiple programs to reuse the same tooling.
- Built and maintain a Python backend and dashboard application that fetches and aggregates test data into views engineers use to monitor testing activity; hosted on Kubernetes to provide a reliable, scalable backend supporting 200+ engineers.
- Manage and maintain Docker images using JFrog Artifactory; maintain internal applications deployed on Kubernetes servers.
- Collaborate cross-functionally with engineering squads and stakeholders to align product direction, communicate progress, and drive adoption of new tooling.

Director of Creative Solutions — BrightMinds Speakers

2019-06 – Present

Remote

- Collaborated with clients to design UX/UI experiences for their websites, applying human-centered design principles to inform product decisions.
- Designed and launched internal applications, owning the product from ideation through delivery.
- Developed content strategies for small business clients that consistently generated thousands to millions of views, leveraging data and audience analytics to drive roadmap and feature prioritization.
- Led creative production using Final Cut Pro and other tools, managing multiple client priorities simultaneously while maintaining clear stakeholder communication.

Genius — Apple

2024-02 – 2025-12

New Haven, CT

- Delivered customer-facing technical support on macOS and iOS devices, maintaining a Net Promoter Score above 90 — demonstrating experience with external-facing product channels and frontline employee workflows.
- Mentored teammates on technical workflows and led daily operational downloads, supporting change management and team communication.

SOC Analyst — Charles IT

2023-06 – 2024-02

Middletown, CT

- Monitored and triaged SIEM alerts, investigated security incidents, and managed user access and VPN configurations using Active Directory and Cisco Meraki for MSP clients, ensuring operational continuity for employee-facing systems.

EDUCATION

Western Governors University — B.S. , Cybersecurity

None – 2026-12

- Expected Graduation: Dec 2026
- Coursework in Agile Project Management

SKILLS

Other: Proven experience as a Product Owner in an agile environment, Formal Agile Product Management training or certification, Experience with Agility (digital.ai / VersionOne) or Aha!, UX/UI collaboration and human-centered design experience, Experience with customer/employee-facing product channels (airport/frontline context), Agile Cross-team Collaboration, Stakeholder communication and management, Change management and organizational communication, JFrog Artifactory, Shell Scripting, Bitbucket

language: Python, JavaScript, SQL, Bash, HTML/CSS

tool: Tableau, Docker, Kubernetes, Git, REST APIs, CI/CD pipeline experience, Active Directory

skill: AI integration

platform: macOS/iOS, Azure
