Work Experience

Automation & Reporting Engineer (Career Experience)

Apple

Sunnyvale, CA

Jan 2026 - Present

- I built and shipped a Python SDK that uses AI-driven summarization and automates our end-to-end test reporting pipeline, from API data ingestion and Tableau dashboards to HTML/CSS email reports.
- I cut report turnaround from ~3 hours to minutes by containerizing the workflow with Docker and running it on internal CI/CD tooling.
- I published the SDK to our internal package registry and partnered with another team to adopt it, so multiple programs now reuse the same tooling.
- I build and maintain a new Python backend and dashboard application that fetches and aggregates test data into views engineers use to monitor testing activity.
- I host our application on Kubernetes to provide a reliable backend that scales to support 200+ engineers.

Genius

Apple

New Haven, CT

Feb 2024 - Dec 2025

- Maintained a Net Promoter Score above 90 through hardware and software troubleshooting on macOS and iOS devices; led daily downloads and mentored teammates on technical workflows.

SOC Analyst

Charles IT

Middletown, CT

Jun 2023 - Feb 2024

- Monitored and triaged SIEM alerts, investigated security incidents, and managed user access and VPN configurations using Active Directory and Cisco Meraki for MSP clients.

Director of Creative Solutions

BrightMinds Speakers

Remote

Jun 2019 - Present

- Led creative production using Final Cut Pro and other creative tools, developing content strategies for small business clients that consistently generate thousands to millions of views.
